Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by DE 27 34 512.

3. Applicant has provided the European search report where this reference is described in the parent application. The reference is also discussed on page 1 of the specification. The reference teaches a switch that is open when the motor is at rest. A manual operation of the switch starts the motor. A centrifugal mechanism opens the switch at the end of the desired movement.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hormann.

Applicant has the wording of "rotatably" in claim 1 "to help distinguish the invention from the prior art." Hormann is used to teach this feature with all of the previous recited limitations. See column 5 lines 24-50 to show a bistable switch that is activated upon a panel traveling past it. The travel of the panel on a particular direction indicates an end of travel whereby movement is

halted and power supply to the motor is cut off. The switch is taught to be exclusively operable in a manual mode during certain times of operation as describe in this passage.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Martin whose telephone number is (703)308-3121.

6. This is a continuation of applicant's earlier Application No. 09/240,240. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

7. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2837

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

A handwritten signature in black ink, appearing to read 'D. S. Martin', with a stylized flourish at the end.
